

# SUYASH SINGH

Full-Stack Developer

Greater Noida, UP | +91 8318176090 | [suyashsingh2711@gmail.com](mailto:suyashsingh2711@gmail.com)  
LinkedIn: [linkedin.com/in/suyash-singh](https://www.linkedin.com/in/suyash-singh) | GitHub: [github.com/suyash503](https://github.com/suyash503)

## PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate and full-stack developer with three applications deployed in production. Works across the stack in JavaScript, TypeScript, and Python: React frontends, Node.js and FastAPI services, and relational and document data layers deployed on Vercel and Render. Comfortable owning a feature end to end - schema design, API contract, UI, and the tests that keep it honest.

## EDUCATION

**Ajay Kumar Garg Engineering College (AKGEC)**

*B.Tech, Computer Science and Engineering (expected graduation July 2027), CGPA: 7.5/10*

Ghaziabad, UP  
09/2023 - 07/2027

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, C++, SQL, HTML5, CSS3

**Frontend:** React, Next.js, React Native, Vite, Tailwind CSS, Responsive Design

**Backend:** Node.js, Express, FastAPI, REST API Design, WebSockets

**Databases:** PostgreSQL, MongoDB Atlas, SQLite, SQLAlchemy, Database Schema Design

**Cloud & Tools:** Git, GitHub, Vercel, Render, Postman, Linux

**Testing & Practices:** Unit Testing, Code Review, Agile/Scrum, OAuth 2.0, Object-Oriented Programming, Data Structures and Algorithms

**AI Integration:** RAG (Retrieval-Augmented Generation), LangChain, Vector Search, LLM Integration (Gemini, Groq/Llama 3)

## EXPERIENCE

### Unique Technologies

*Full-Stack Developer Intern*

Noida, UP  
09/2025 - 12/2025

- Developed and optimised responsive production applications in React and Node.js alongside a cross-functional team, owning features across component work, API integration, and backend endpoints.
- Integrated new REST API endpoints and refactored data fetching, cutting redundant client requests and improving fetch efficiency by 15%.
- Resolved 20+ software tickets across Agile sprint cycles, participating in code review and documenting technical solutions for the team.

### Training and Placement Cell, AKGEC

*Student Volunteer and Coordinator*

Ghaziabad, UP  
11/2025 - Present

- Coordinate interview scheduling between students and corporate recruiters across campus recruitment drives, and produce video and content assets promoting placement initiatives.

## PROJECTS

**Smart Doctor Appointment System** | *React, FastAPI, SQLAlchemy, MCP, Groq/Llama 3* | [smart-doctor-ai.vercel.app | github.com/suyash503/Smart-doctor-appointment-system](https://github.com/suyash503/Smart-doctor-appointment-system)

- Architected a full-stack scheduling application with a React frontend and FastAPI backend, persisting appointments through SQLAlchemy with schema-level constraints on doctor, slot, and patient records.
- Designed an agentic tool-calling layer over Model Context Protocol (MCP) that turns natural-language requests into validated database writes, enforcing Pydantic schemas so malformed model output is rejected before reaching the data layer.
- Integrated Google Calendar over OAuth 2.0 with graceful degradation, persisting the appointment and continuing the session when the external API is unavailable on the headless host.
- Deployed the React client on Vercel and the API on Render, resolving cross-origin and cold-start issues to keep the live demo publicly reachable.

**Reddit Sentiment Analysis Dashboard** | *JavaScript, Vite, Node Test Runner* | [reddit-sentiment-analysis-suyash.vercel.app | github.com/suyash503/Reddit-Sentiment-Analysis](https://github.com/suyash503/Reddit-Sentiment-Analysis)

- Developed a client-side dashboard that scores the 50 hottest posts of any subreddit against a sentiment lexicon, rendering an aggregate score, mood distribution, and the terms driving the result.
- Wrote 33 unit tests on the built-in Node test runner covering scoring and fetch logic with no network calls and zero added dependencies; resolved Reddit API CORS through a dev-server proxy.

**College Placement RAG Assistant** | *LangChain, MongoDB Atlas Vector Search, Gemini 2.5 Flash, FastAPI* | [github.com/suyash503/placement-rag](https://github.com/suyash503/placement-rag)

- Engineered a retrieval pipeline over 2,700+ campus recruitment records: chunked multi-format data, generated 384-dimension MiniLM embeddings, and indexed them in MongoDB Atlas Vector Search.
- Implemented hybrid retrieval combining vector search with BM25 keyword matching via Reciprocal Rank Fusion, then cross-encoder reranking; measured hit-rate and MRR across a 33-question evaluation set to validate the contribution of each stage.

## CERTIFICATIONS

- The Web Developer Bootcamp 2025 - Udemy, 2025 | Verify
- Machine Learning Specialization - DeepLearning.AI and Stanford University, 2025 | Verify
